

# FiltroTex Mask

Textile Mask - Disposable Filter

Disposable tissue paper  
inserted here...

... in a pocket between  
2 fabric layers

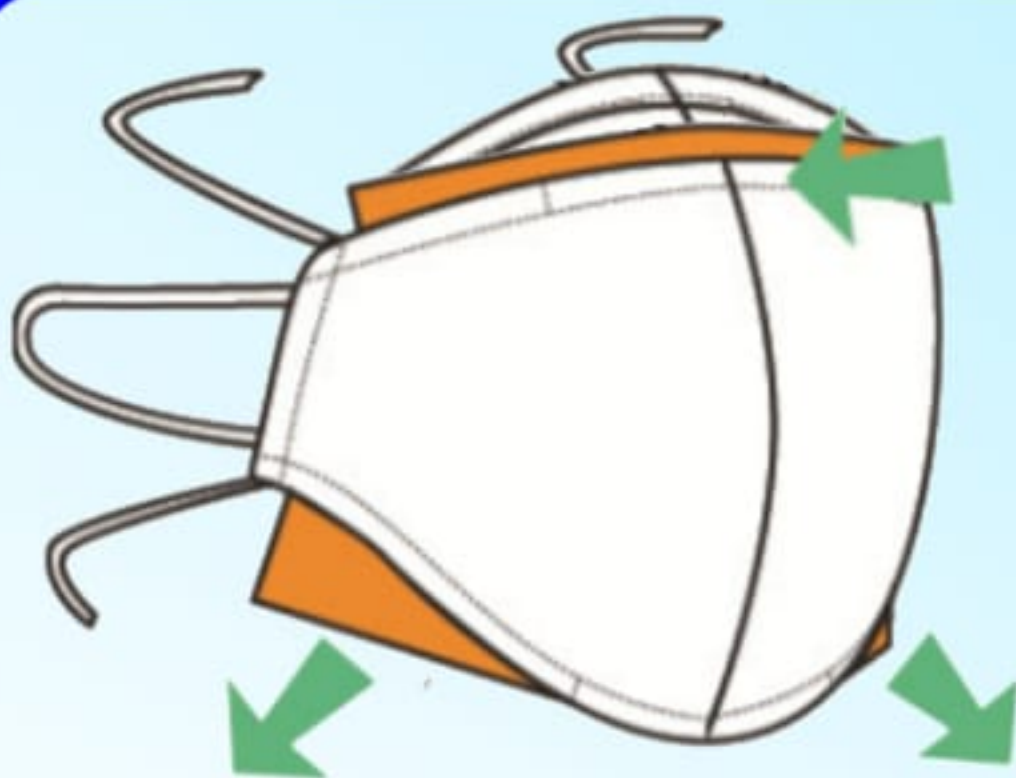

Elastic & double head  
straps for secure fastening

Metal wire  
around nose

Fabric masks have a  
virus filtration efficiency  
of only 10%, BUT...

**FiltroTex** is different  
Inside its fabric pocket,  
you insert 3 layers of  
disposable tissue paper.

This makes virus filtration  
reach an amazing  
**90%!!!**  
similar to standard  
surgical masks

Pull the tissue paper to  
the bottom and the top  
of FiltroTex to ensure it covers  
the whole mask.

## How to Clean FiltroTex

1 Wash with  
water and soap

2. Iron the mask  
to sanitize it
